

Shubham Gupta

Infrastructure Engineer

Frankfurt, Germany | guptashubham131@gmail.com | +49 1575 5754701

Experience

Senior DevOps Engineer, Tech Mahindra Pvt. Ltd. – Muscat, Oman & India July 2023 – Sept 2025

- Maintained CI/CD pipelines on Azure DevOps and Jenkins for 50+ microservices. Debugged build failures and managed production releases.
- Provisioned and managed Azure infrastructure (VMs, VNets, AKS) using Terraform modules with Git-backed state management.
- Operated production Kubernetes clusters with Docker workloads. Handled pod scaling, rolling updates, and traffic spike response.
- Responded to on-call alerts, performed root cause analysis, and implemented fixes to prevent recurring incidents.
- Configured Azure Monitor and Application Insights alerting. Tuned thresholds and tracked platform uptime metrics.
- Developed Python and Bash automation scripts for log rotation and health checks. Reduced manual operational work by ~60%.
- Managed Azure AD RBAC, OAuth 2.0, NSG rules, and VPN access. Handled credential rotation across environments.

DevOps Engineer, SSG Consulting Pvt. Ltd. (Rencata) – Chennai, India July 2020 – June 2023

- Built CI/CD pipelines and Azure cloud infrastructure for a financial services platform supporting 100+ microservices.
- Managed Kubernetes orchestration with Helm charts and service mesh configurations for high-throughput API workloads.
- Deployed Prometheus and Grafana monitoring with SLO-based alerting. Reduced incident detection time to under 5 minutes.
- Managed secrets and certificate rotation through Azure Key Vault across development and production environments.

DevOps Engineer, Accenture PLC – India Apr 2019 – Sept 2019

- Built CI/CD pipelines in Azure DevOps, Git, and Jenkins with automated rollback for enterprise integration systems.
- Provisioned Azure compute, networking, and storage using Terraform and ARM templates.
- Containerized legacy applications with Docker and deployed to Kubernetes. Resolved environment drift.

DevOps Engineer, Tech Mahindra Pvt. Ltd. – India Dec 2016 – Apr 2019

- Migrated on-premise infrastructure to Azure using Terraform. Reduced environment provisioning from days to under an hour.
- Managed Linux production servers and Azure resources with automated patching, health checks, and failover.
- Standardized server configuration using Python and Bash scripts. Eliminated manual setup errors.

Education

RGPV, Bhopal, India, Bachelor of Engineering (B.E.) 2012 – 2016

Skills

Cloud & Infrastructure: Azure, Terraform, Docker, Kubernetes

DevOps & Automation: CI/CD, Azure DevOps, Python, Linux, Git, Monitoring

Work Authorization

Work Authorization: EU Blue Card eligible — no sponsorship required · Available immediately
